

PROJECT STATUS UPDATE APP

Aleksandra Janda

March 2026

POWERED BY POWER AUTOMATE & POWER APPS

PROJECT STATUS UPDATE APP

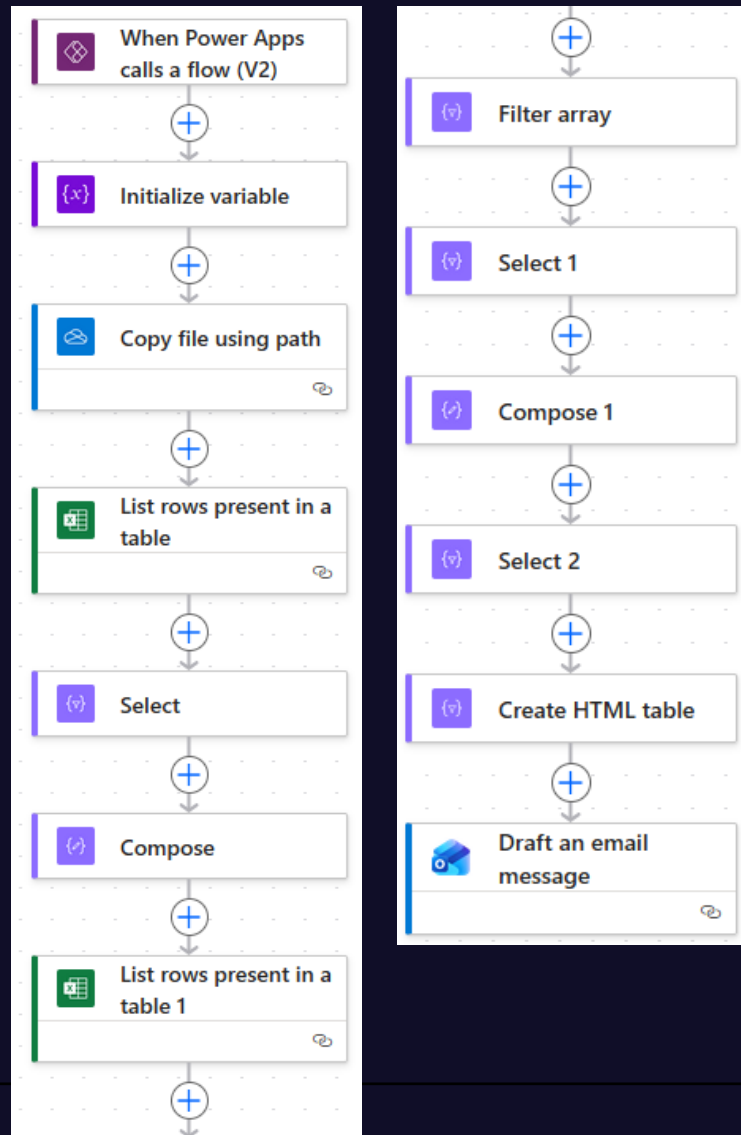

This app's goal is to reduce the amount of time employees spend on Project Status Update meetings. This meeting is 3h long, takes place each Monday, so it requires a lot of time that could be dedicated for other tasks related to clients.

In this presentation I'll take you on a tour through the app.

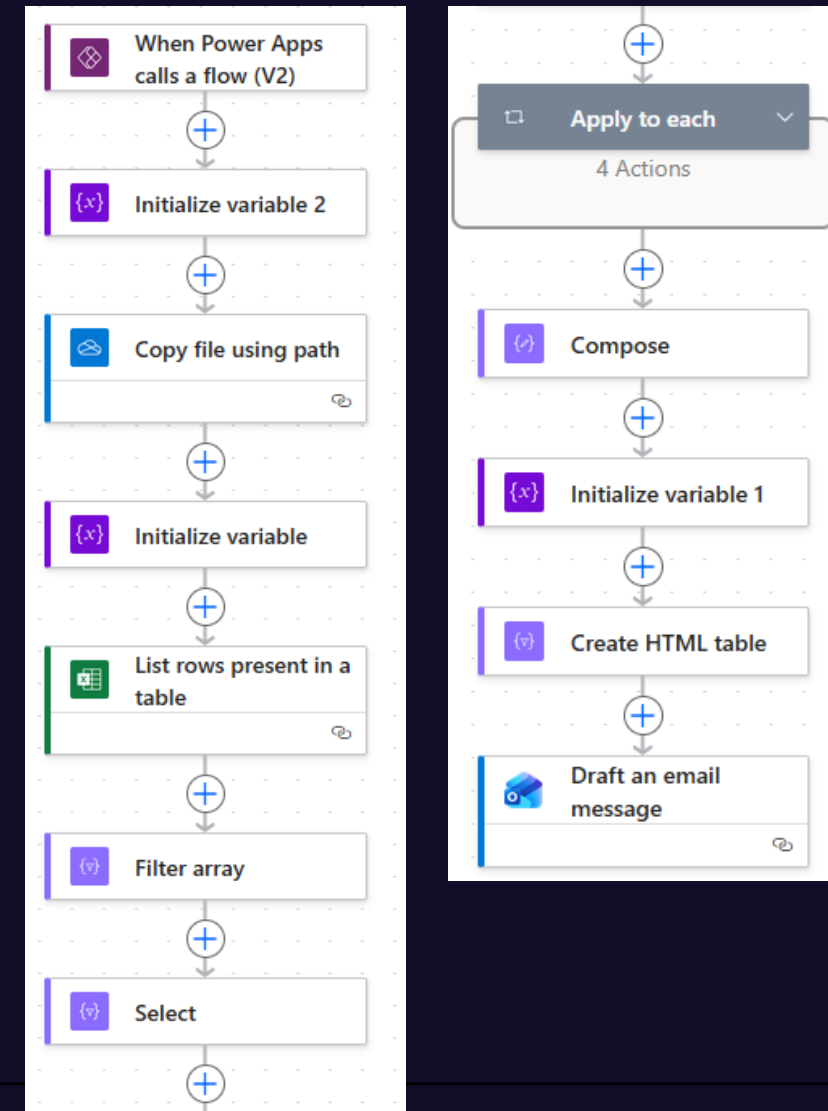

First, we need two working Power Automate workflows, that will be called inside the Power Apps.

Also we need a file on One Drive that will act as a mini-database. This file is connected to flows as well as main app.

Export file – Power Automate flow to create a Project Status Update summary

Call Required – Power Automate flow to send an email to people required to attend the call

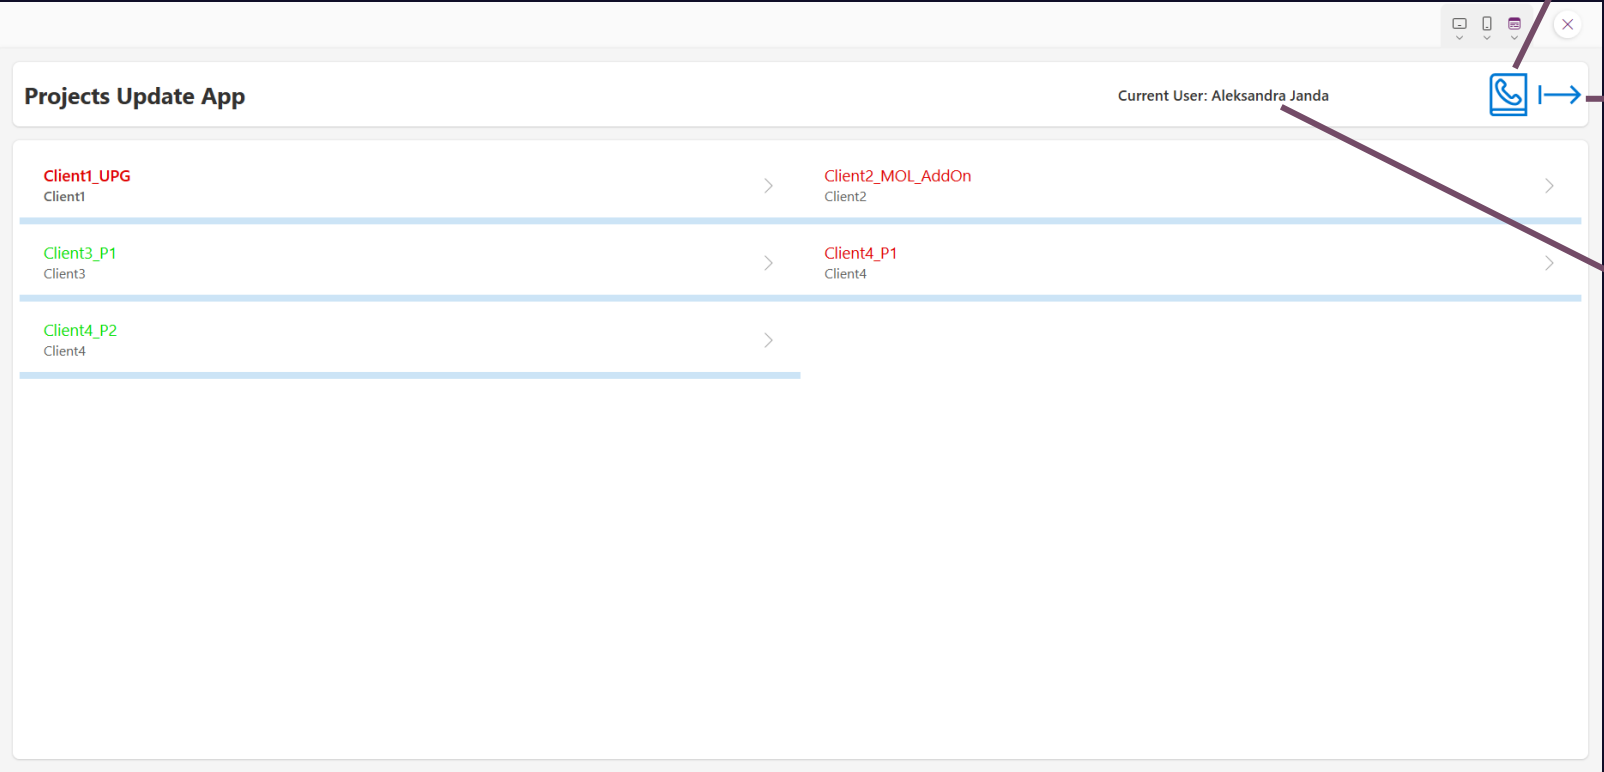

Project Status Update app – main screen

Call required screen

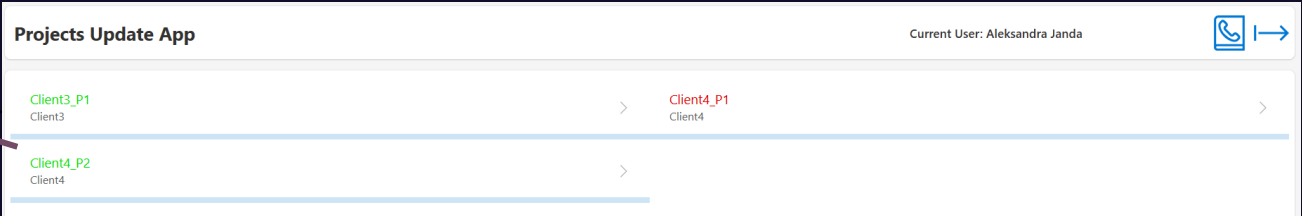

Project Updates screen

Current user

The main screen has a list of on-going projects.
Red projects need to be updated this week. Green ones – the update has already been provided.
Users can see only projects assigned to them.

Update

The client requested the information on the task

Pencil = edit button, user can edit project info or currently selected update

+ = add new update

<-, = return to main screen

Project info: Date of Go-Live, Status, Last Update Date,
Tasks statistics (total, new this week, closed this week),
Mon - Sun – how many meetings happened this week,
Call Required – indicate if employees need to attend the call to discuss more advanced issues

List of employees engaged in the project

List of previous updates

Currently selected update (has a date, user who provided update and the text)

Call Required Requests

Send draft message, here
Call Required flow from
Power Automate is called

Call Required Requests							
Call Required	Client	Project	Lead	GL Date	Status	Tasks	Last Update Date
No	Client1	Client1_UPG	Employee1	08.02.2026	Pre-Live	30	2026-03-06
Yes - Implementer	Client2	Client2_MOL_AddOn	Employee5	07.01.2027	Validation	10	2026-02-02
Yes - Manager	Client3	Client3_P1	Aleksandra Janda	14.05.2026	Kick-Off	10	2026-03-05
No	Client4	Client4_P1		20.03.2026	Post-Live		2026-01-12
No	Client4	Client4_P2		30.01.2026	Go-Live	20	2026-03-02

Manager who has access to this
screen can modify the project.
Example – employee has a No in
Call Required when providing the
update, but the manager has
something to talk about with this
employee regarding his project.
After clicking on edit button, the
box appears and manager can
modify Call Required to Yes –
Manager, which indicates
manager request for the employee
to attend the call.

Please attend our weekly meeting:

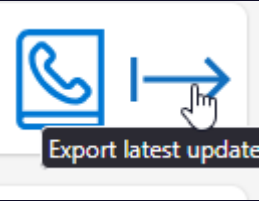

Employee5,Employee6,Employee7,Employee8,Aleksandra Janda,

Client	Lead	Assist1	Assist2	Trainee	Call Required
Client2	Employee5	Employee6	Employee7	Employee8	Yes - Implementer
Client3	Aleksandra Janda				Yes - Manager

Thank you.

The draft message is prepared in the manager’s email. The automatically generated message has a list of required employees and a table with clients, who had Call required set to Yes. The manager can modify the email contents before sending. Employees list can also be transferred as email addresses through Power Automate flow.

Export Project Updates button

The draft message is prepared in the manager’s email. The automatically generated message has a list of projects with their latest updates.
